Redikall Manifestation

Master the principles and the art of manifestation in a Karmically aligned way

There are two major differences between Redikall Manifestation and the best-known ways of manifestation.

1. Redikall Manifestation is experience-centric. You learn to manifest the experience and not the means to the experience. Because even if you get the means manifested, the experience eludes you. On the contrary, when you manifest an experience, the means to the experience gets manifested easily.
2. Redikall Manifestation teaches you how to face and embrace instead of choosing to escape under the pretext of manifestation. If you are manifesting in order to avoid something, you may eventually experience all those experiences you avoided earlier. However, if you manifest proactively, by facing all that you have been avoiding, your experience at the end of the manifestations would be more emotionally enriching and rewarding.
3. Redikall Manifestation co-creates as per the life plan and life purpose. When you manifest in alignment with the life plan and life purpose, you will find yourself in a better position to manifest as your manifestation does not deprive anyone of their life experiences. And at the same time, when you manifest, you create a win-win situation that is aligned to the greater good for humanity and the entire cosmic presence.
4. When you co-create with fellow beings, your manifestation happens in an easy and effortless way with simplicity and joy. You also avail divine assistance and a lot of support from the universal elements. As you recognize the flow, move forward in alignment with the flow, it gets easier for you to manifest.
5. Manifestation teaches you about yourself. It will help you discover your brilliance and will create a way for rising beyond your limited perceptions and expand your horizon.

Advanced Redikall Consciousness

Become a conscious observer of your life with Advanced level techniques

Details:

You have an opportunity to learn Redikall SS Level 3 (ARC) ONLINE from the Founder, Aatmn Parmar.

Think your way to an Empowered Personal and Professional Life with Advanced Redikall Consciousness

Objectives:

- Becoming a detached observer to the game of life

- Healing your relationships with Body
- Healing your relationship with Soul.

Redikall Money & Maya

Decode the game called lifeMoney by decoding the games of Moneylife.

Learn Concepts of Metaphysics and Money.

Money is the greatest MAYA, the greatest illusion, and yet it is a sound reality for many. When you gain a deeper understanding of the nature of money, you not only rise above the 'game-play' with it, you also gain tremendous insights about your own life, through money.

Your thoughts acutely affect the flow of finances in your life. However, it's not necessary that you would know exactly which thoughts are affecting you and your finances. We empower you to be in charge of your thoughts, career, and finances, based on a sound understanding of the mind and metaphysics.

The Art of Being

Success is inversely proportional to the inner stillness and state of 'BEING'.

Instead of rushing to continue 'DOING' something or the other, you need sufficient awareness, experience, practice, and inner calm to remain in the state of BEING while participating in life actively.

This is a ZEN state where you remain a mere witness. Some of the Redikall Techniques cut short several years of rigorous practice and help you get in touch with the state of being.

Lead by Aatmn Parmar, this Retreat would be the culmination of your spiritual quest. Besides, you will master the art of conducting Soul Metaplay with higher consciousness and inner awareness.

This Retreat also empowers you and certifies you to be a Soul Metaplay Facilitator.
